1. In March, 1959 the flight testing of the prototype Granger Countermeasures Repeater, Mod 504, was completed at the Edwards Air Force Base, [REDACTED], California, facility. The performance of the electronic equipment was satisfactory in accomplishing the requirements of the prototype design specifications.

2. The Edwards facility was directed by CHALICE Headquarters via [REDACTED]-7742, dated 13 April 1959, cable to deliver the Repeater Jammer to [REDACTED] rather than return this item to WADC. [REDACTED]-3192, dated 28 April 1959, confirmed this delivery.
